AND DEVELOPMENTS

Liquefied Petroleum Gas (LPG) is a clean-burning and efficient fuel and a vital source of energy for hundreds of millions of people throughout the world today. With an immediate and global availability, environmental benefits, its natural by-product origin, transportation flexibility and diverse application, LPG plays a pivotal role in the transition towards a more secure, sustainable and competitive energy model.

In order to create the right environment for the continued, sustainable growth of the LPG industry in the Philippines, we are proud to bring the industry together in the first **LPG PHILIPPINES SUMMIT**, hosted in Manila, Philippines on the 24 - 25 August 2011. The conference will provide the platform to examine the world of LPG as a energy source and will bring together the entire market value chain to discuss, network and share ideas on promoting the advancement of the industry.
